Destiny 15.5 System Requirements–Workstation and Mobile Devices

IMPORTANT As of January 16, 2016, Microsoft discontinued security updates and technical support for Internet Explorer (IE) 10 or earlier. Due to the security vulnerabilities this creates, Follett no longer supports Internet Explorer 10. We recommend that all Destiny and Follett eBook customers update to Internet Explorer 11 or another current browser, such as Google Chrome, Mozilla Firefox or Apple Safari. See https://www.microsoft.com/en-us/WindowsForBusiness/End-of-IE-support. Customers using IE must make sure that IE is not running in Compatibility View; Destiny Discover cannot be accessed in IE's Compatibility View. Follett Support associates might be unable to resolve issues for customers running Destiny on unsupported versions of Microsoft software.

[1]Destiny Discover is supported on smartphones. Destiny's search features are accessible from tablets (including iPad and Chromebook devices). For full circulation and cataloging functionality, Follett recommends using desktops and laptops.

[2]Scanning of barcodes in the Follett Destiny app is supported on third-generation iPads and iPhone 3GS or later.

[3] Destiny Discover is supported on Kindle Fire devices via the browser. The Destiny Discover app for Android is available for Kindle Fire HD and Kindle Fire HD+. If you have a 2nd-generation device, you can go to the Amazon Appstore to install the app; if you have a 3rd-, 4th- or 5th-generation device, you can install the app through a process called "side-loading".
